Institution Comparisons

Compare results for all measures among California prisons

The Dashboard is intended to support headquarters and institution staff in identifying opportunities for improvement and monitoring progress toward performance objectives. However, there are limitations to the information: California Correctional Health Care Services (CCHCS) has standardized many data collection processes, provided training to promote consistency in data reporting, and invested in information system modifications to improve data quality. However, much of the data featured in the Health Care Services Dashboard is gathered through multiple networked databases or self-reported by institutions, and the data have not been validated or verified. Performance objectives and benchmarks were generated internally for quality improvement purposes and are not necessarily intended to reflect compliance with court mandates or a determination regarding constitutional levels of care.

MEDICAL PROGRAM INSPECTIONS			
Overall Score	Goal: ≥85% adherence High: >85% Moderate: 75%-84% Low: <75%	The Office of the Inspector General (OIG) uses a series of “yes” or “no” questions to determine adherence in 20 components of medical delivery (e.g., Chronic Care). Each inspection question is weighted and scored by calculating the percentage of “yes” answers for each question from all items sampled. That percentage is then multiplied by the question’s weight to arrive at a weighted score. The total score is calculated by summing the number of weighted subject points earned and dividing that value by the overall number of weighted points possible. Reported percentages reflect the most recent OIG inspection results. See OIG website for details: http://www.oig.ca.gov/pages/reports/medical-inspections.php .	OIG Medical Inspection Results

MENTAL HEALTH TIMEFRAME COMPLIANCE			
Contact Intervals	High: ≥85% Moderate: 75%-84% Low: <75%	Percentage adherence to the Mental Health Services Delivery System’s (MHSDS) inmate-patient contact timeframes. Compliance is measured weekly through MHSDS and include routine Interdisciplinary Treatment Team (IDTT), psychiatrist, and primary clinician (PC) contacts. Aggregated percentage adherence represents adherence to contact type timeframes for each care program and housing placement [limited to Correctional Clinical Case Management System (CCCMS), Enhanced Outpatient Program (EOP), housed in Mainline (ML) or the Reception Center (RC)].
